PROFILE SUMMARY

Aspiring Frontend Developer with experience in React.js, eager to contribute to a dynamic team at Cobalt. Proficient in developing user-friendly web applications with a focus on responsive design, seamless user experiences, and clean code. Adaptable and proactive, with a passion for learning and solving real-world challenges through technology.

PROJECTS

Tutor Connect

June 2024- Current

Tools: React, Django, Redux

A full-featured web application for tutor booking and management.

Responsibilities:

- Designed and implemented scalable backend architecture using Django and Django REST Framework
- Developed robust server-side logic, ensuring efficient data storage, retrieval, and user management
- Implemented secure user authentication and authorization using JWT
- Created a responsive front-end interface using React and integrated with backend services.
- Utilized Redux for state management, ensuring consistent and predictable application behavior.

E-Commerce

September 2023 – January 2024

Tools: Django, AWS, PostgreSQL

Responsibilities:

- Developed secure server-side logic for transaction processing with Django.
- Implemented real-time Paypal Payment Processor
- Designed database schema using PostgreSQL, hosted on AWS RDS.
- Deployed and managed the application on AWS EC2, focusing on high availability and scalability.

Additional Information

- Open Source Contribution: Added code conversion functionality to Unify.ai, a Y Combinator startup, collaborating with over 1,400 developers.
- Flexibility to relocate within India and work in 24x7 shifts as per business requirements.
- Committed to continuous learning and staying updated with the latest industry trends and technologies.
